The screenshot shows the Linux Foundation website. The top navigation bar is blue with the Linux Foundation logo and links for 'Share', '日本語', and 'LF Sites'. Below this is a dark blue bar with 'HOME', 'TRAINING', 'EVENTS', and 'COLLABORATIVE PROJECTS'. A search bar is on the right. The main content area has a breadcrumb trail 'Home > About Us > FAQ' and the title 'Linux Foundation'. A 'Contents' section lists eight FAQ items with links. The first item, 'What is The Linux Foundation?', is expanded, showing a paragraph about the foundation's mission. The second item, 'Who are members of the Linux Foundation?', is also expanded, listing platinum members and other community groups.

Linux Foundation

<http://www.linuxfoundation.org/about/faq>

**Frequently Asked Questions**

<https://www.drupal.org/project/faq>

**What is The Linux Foundation?**

The Linux Foundation is a nonprofit consortium dedicated to fostering the growth of Linux. Founded in 2000, it sponsors the work of Linux creator Linus Torvalds and is supported by leading companies and developers from around the world. The Linux Foundation promotes, protects and advances Linux by providing unified resources and services needed for open source to successfully compete with closed platforms.

**Who are members of the Linux Foundation?**

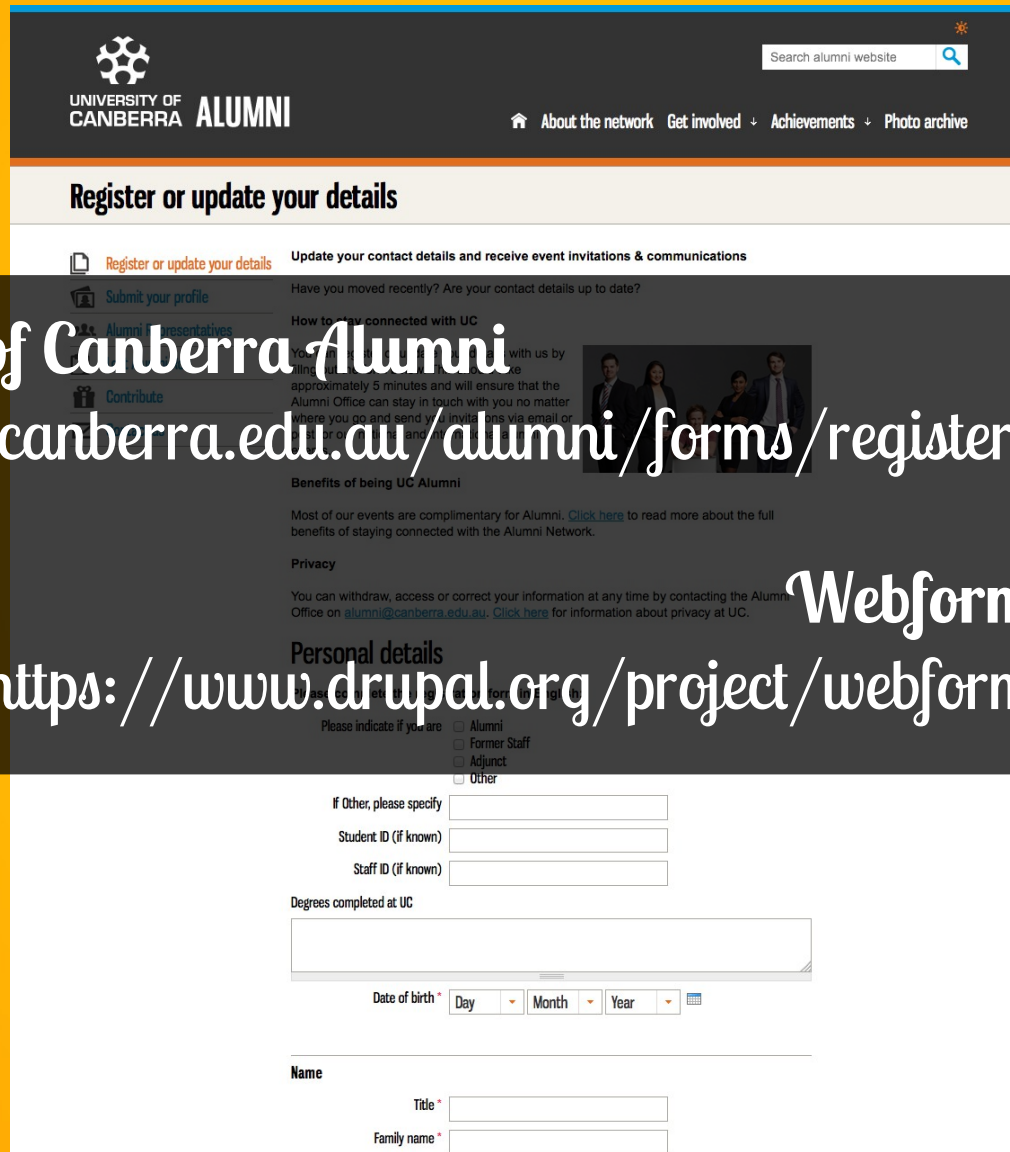

The platinum members of the Linux Foundation are Fujitsu, HP, IBM, Intel, NEC, Oracle, Qualcomm Innovation Center and Samsung. Other members of the organization include every major company in the Linux industry as well as numerous community groups, universities and individuals. You can see the full line up on our [Members](#)

ARTS & ENTERTAINMENT HIGHLIGHTS

**Examiner**  
<http://www.examiner.com/review/slipknot-release-chapter-5-newest-album-6-years>

**Legendary fashion designer Oscar de la Renta dead at 82**  
The designer's career spanned over decades as he brought a sense of style to everyone from celebrities to first ladies. Diagnosed with cancer in 2006, he let the world know he was 'totally clean'...

**Slipknot - .5: The Gray Chapter**  
Rating: ★★★★★  
The anxiously awaited new album from Slipknot officially arrives with their fifth studio album, *.5: The Gray Chapter*, it is the band's fifth studio album and the first to be written and recorded without two founding members, the late bassist Paul Gray and the more recently departed (in a different way) Joey Jordison. The band has been releasing new tracks individually for fans to hear (which is rumored to be because of an album leak) and *Revolver* is currently streaming the entire album on their website. More than likely everyone has already been playing it, but if you've been sitting on your hands and waiting for the actual release to be surprised, here's a rundown of the album and what to expect.

First and foremost, this album sounds different from any other record. Not in a bad way, just different than previous albums, which is to be expected; one, Slipknot doesn't want to re-make the same record, there are two new sets of skills contributing to the mix. One of the standout changes is in Corey Taylor's vocals. It could be the way that they were recorded, but it feels like Taylor's voice

Gallery formatter

<https://www.drupal.org/project/galleryformatter>

Apple's delivering some big changes to OS X. For the first time in over a decade, Apple's desktop operating system has received a complete overhaul, leaving no pixel unturned. In OS X Yosemite, everything from the dock to the "stoplight" buttons have been given a visual makeover, but the changes in Yosemite go far below the surface. Even without any new apps to play with, Apple has given us plenty of things to explore, with an array of features that make OS X more intuitive and powerful than ever before. But if you could use some help adjusting to your new surroundings, pull up a chair and let us help you out.

# Community sites = Advanced layout?

You can't go wrong with any of our picks, but we've still managed to suss out the best Android phones around

It's tempting to say there is no "best" Android smartphone. Good lord, it's tempting. And it might even be true. We've reached the point where every flagship from every manufacturer has a leg up in one area but falls just a tad short in another. If you're willing to spend the money for a top-shelf phone, chances are you're going to come out OK and have an excellent experience.

So we could tell you that there's currently no "best" Android smartphone. But that's the easy way out. We've got to make the call.

**Android Central**

<http://www.androidcentral.com/best-android-phones>

...the best Android phone in 2014. We've experienced the newest phones from Samsung, HTC, LG and others. We've tested. We've reviewed. And, most important, we've used them like we would our own.

We might not all agree on what the best Android phone is, and that's OK, because you really can't go wrong with anything on our list. But we've made the tough decisions.

And here, now, is how things stand at the midpoint of 2014.

**Multipage Navigation**

[https://www.drupal.org/project/multipage\\_navigation](https://www.drupal.org/project/multipage_navigation)

Page 7 of 7: The best Android phone: The HTC One M8

1. The best Android phone: The HTC One M8
2. The best Android phone: The HTC One M8
3. A close second: The LG G3
4. Rounding out the Top 3: The Samsung Galaxy S5
5. Honorable mention: The Sony Xperia Z2
6. If you need something bigger
7. Unlocked or on a budget
